THE CHALLENGE

A student's zip code and school assignment too often determines their access to exceptional teachers, interest-aligned courses and career opportunities.

THE SOLUTION

Connect schools across Massachusetts to share outstanding teachers, live virtual credit bearing courses and career-connected learning.

CWW's ROLE

We make these connections work, coordinating schools, supporting teachers and managing scheduling, enrollment and technology so opportunity can reach more students.

WHY IT MATTERS

Even in Massachusetts, ranked first in the nation for academic performance, a student's zip code and school assignment still largely determines the quality of their education and in turn, their future.

THROUGH THIS MODEL, STUDENTS CAN:

- Take unique credit bearing courses not offered at their school
- Learn alongside students from across the state
- Access rigorous and niche academic opportunities
- Participate in project-based and culturally relevant learning
- Explore career-connected experiences and industry pathways
- Build college and workforce readiness skills

OUR VISION

We imagine a Commonwealth where every student, whether in Greater Boston, the North Shore, the South Shore, Western Massachusetts, Cape Cod and the islands, or anywhere in between can learn from exceptional educators, explore high-growth careers, and shape a personalized learning pathway aligned to their future.

OUR MISSION

To transform how education is delivered by connecting schools, educators, and industry partners through a statewide live, virtual learning consortium that ensures equitable access to excellent teaching, career connected learning, and student agency.

GET INVOLVED

Schools, districts, industry partners, and funders: scan to share how you would like to be part of the network.

CAMPUS WITHOUT WALLS

STATEWIDE · MASSACHUSETTS

One State. One Classroom.
Endless Possibilities.

THE EDUCATIONAL MODEL

Expanded access. More opportunities.

Through a statewide live course sharing consortium, students gain access to rigorous coursework, industry led career exploration, and real world learning opportunities while remaining rooted in their home schools.

1 Contribute one course
Each partner school contributes one Lead Teacher to offer dual enrollment, advanced academics, or specialized, interest-aligned coursework.

2 Gain a menu of courses
In exchange, the school gains access to a menu of other courses from across the consortium.

3 Students stay rooted
Courses are fully online and live. Students remain enrolled in and supported by their local schools, within existing schedules, during the school day..

4 Credit sharing
All courses have been aligned to meet Mass Core graduation requirements.

Not a virtual school.

Districts participate as partners, not customers, sharing instructional talent, specialized expertise, and course offerings rather than competing for scarce resources. Collaborative, system building, and equity driven by design.

Partner schools contribute what they do best and access what they cannot provide alone.

THE ECOSYSTEM

A more connected education ecosystem.

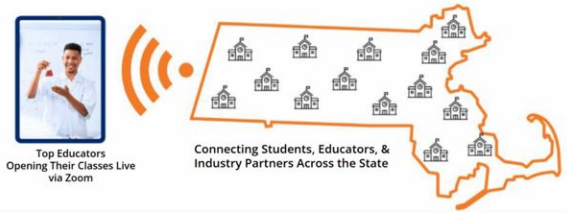

Students gain expanded choice, stronger networks, and clearer pathways to college and careers.

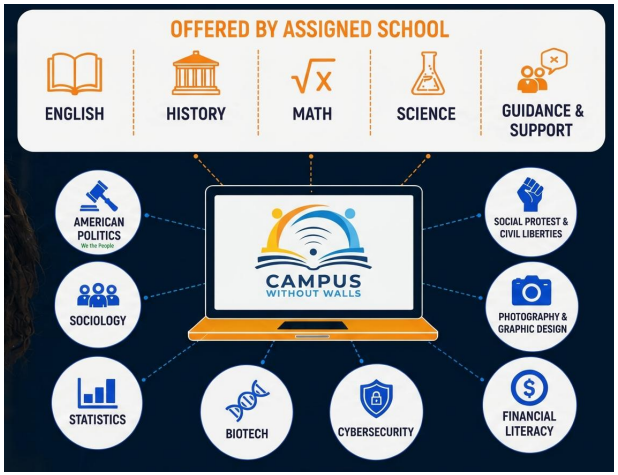

Educators gain cross district collaboration and the opportunity to share expertise statewide.

Schools and districts expand course offerings without the constraints of traditional scheduling, budget, space or staffing limitations.

Industry partners strengthen local talent pipelines by engaging students early and meaningfully.

HOW IT WORKS

CAREER PATHWAYS

From classroom to career.

Our Career Pathways open doors to living-wage careers in three high-demand industries. Live, virtual modules bring industry experts into classrooms, making employee engagement easy to scale. Students also connect with mentors and employers for work-based learning opportunities that turn exploration into experience.

- **Business and Finance**
- **Healthcare and Life Sciences**
- **Cybersecurity and Technology**

…would recommend CWW career modules to friends or colleagues

"The career exploration unit is an invaluable practical experience for anyone feeling unsure about their future or wanting to validate their career choices. It goes beyond just looking at job titles; it helps you connect your personal interests, skills, and values to specific actionable career paths." - student testimonial
